- » Officejet Pro 8500A e-AiO
- » Officejet Pro 8500A Plus e-AiO
- » Officejet Pro 8500A Premium e-AiO

1. Requires an internet connection to the printer. Feature works with any internet- and email-capable device. Details at www.hp.com/go/ePrintCenter.
2. Supports iOS 4.2 devices with internet connection. Works with HP ePrint-enabled printers and all-in-ones. Requires a wireless connection to the printer. Wireless performance is dependent upon physical environment and distance from access point.
3. Firmware upgrades for HP web-connected Photosmart and Officejet printers happen automatically when "Enable Web Services" is turned on from the front panel. LaserJet firmware upgrades will need to be downloaded from HP's support website (see URLs above) and installed to the device using a Macintosh or PC. HP recommends always updating to the latest firmware version for the best printer performance.
4. Product availability may vary by country.
